

## LET OUR DATA TOOLS DRIVE YOUR DECISIONS

Founded in 1997, TRICAST, Inc., is a pharmacy data analytics and consulting firm. Our proprietary software products help you manage your pharmaceutical expenditures and utilization with a next-generation approach that discovers, analyzes, and defines your program's opportunities and risks.

## PHARMACY CHANNEL OVERSIGHT TOOLS

Auditing, forecasting, risk analysis. It's this end-to-end, multi-phase approach that makes our software so powerful. Given the universal needs of pharmacy chain stakeholders, our tools enable you to maintain a hands-on approach to your pharmaceutical-related expenditures and utilization analysis.

## DELIVERING VALUE IN ALL WE DO

Solutions based on 100% data review—communicated in a user friendly format for easy decision support—give you all the information you need for process improvement, quality assurance, and actuarially sound modeling.

## Accurate. Factual. Assessment.

### Capability

AccuCAST is designed to forecast claims costs by reprocessing existing claims against new copays, trends, formularies and more.

The end result? A simulated projection period of claim level data. AccuCAST provides many useful output report options, including continuance tables, cost and utilization summaries, and the CMS Bid Processing Tool (BPT).

### Confidence

AccuCAST provides automated factor development and continuance tables that shorten the data-to-premium timelines. TRICAST also offers full implementation support through our partnership with Wakely Consulting Group.

Wakely provides advanced user experience to assure optimal use of AccuCAST.

Concerned about risk assessment and pharmacy premium pricing? Need to capture competitive and reliable pharmacy program pricing?

AccuCAST is the first actuarial support application for enhanced underwriting and improved risk assessment.

AccuCAST is available to payors, benefits advisors, and PBMs to evaluate prescription drug decisions while dramatically improving the speed of actuarial assessments—including Medicare Part D.

### Data-Driven

AccuCAST uses historical pharmacy claims and eligibility data to quickly and accurately:

- Re-price claim costs for:
- Enhanced plans or new plan designs
- Any formulary changes
- Mail-Retail-Specialty or 90 day Retail by drug type and / or provider
- Compare historical claims cost against industry benchmarks
- Measure trend by utilization and ingredient costs
- Model pricing with any user defined assumptions
- Provide all CMS required actuarial support for Part D filing, including automated completion of CMS worksheets.
